Summary

Computer Science graduate from UPM, with a strong interest in software development, computer systems, and cybersecurity. Experienced in Linux environments and low-level programming, with a keen interest in technical analysis and the development of technological solutions. Recognized for fast learning, responsibility, and motivation to contribute to research and technology projects.

Education

ETSIINF, UPM, Bachelor's Degree in Computer Science – Madrid, Spain Sept 2021 – June 2026

- EQF Level 6

I.E.S. Juanelo Turriano, High School Diploma in Science and Technology – Toledo, Spain Sept 2019 – June 2021

- EQF Level 4

Projects

Library REST API

- Designed and implemented a RESTful service for book inventory and loan management.
- Applied HATEOAS principles and relational database persistence.
- Used Java, Spring Boot, PostgreSQL, Maven, Postman, and GitHub.

Tennis Tournament Management App

- Developed a cross-platform mobile application for managing tournaments, players, and results.
- Integrated authentication and cloud storage using Firebase.
- Utilized Flutter, Dart, Firebase (Firestore and Authentication), and GitHub.

ThesisMatch (Bachelor's Thesis)

- Designed and developed a full-stack web platform that matches PhD candidates with potential thesis supervisors through an academic recommendation system.
- Implemented a client-server architecture with a Spring Boot backend and Next.js frontend, including JWT authentication and role-based access control.
- Developed REST APIs, PostgreSQL persistence using JPA/Hibernate, and an affinity-based search and recommendation system.
- Technologies: Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, JPA/Hibernate, Next.js, TypeScript, Tailwind CSS, and Maven.

Language Processor

- Developed a modular compiler with lexical, syntactic, and semantic analyzers.
- Implemented symbol table generation and error detection.
- Used Java and GitHub.

Mini Shell in C

- Implemented a command-line interpreter with support for pipes, redirections, and process control.
- Utilized C, Linux system calls (fork, exec, pipe, wait), and Makefile.

Certifications

CCNA: Introduction to Networks – Cisco Networking Academy

Sept 2024

Skills

Programming Languages: Java, Python, C, TypeScript, Dart, SQL, JSON, XML

Frameworks & Tools: Spring Boot, Spring Security, Next.js, Flutter, Tailwind CSS, Maven, Git, GitHub, GitLab, Docker, Postman

Databases & Systems: PostgreSQL, MySQL, Firebase, JPA/Hibernate, Linux

Soft Skills: Teamwork, problem-solving, autonomous learning

Languages

Spanish: Native

English: C1
